Preacher: Jon Watson

[0 : 00] The 30th of November, renewable energy. For the word of God is full of living power. Hebrews 4.12, NLT Renewable energy is something that is often in the news.

There is a whole industry built around harnessing the forces of nature that will give us power, light, and comfort without using fossil fuels that can run out, and whose use leads to carbon emissions which pollute the atmosphere and hasten climate change.

So wind and tides and the sun give us renewable energy. There is an interesting group of words which we find in the Bible which tell us about the wonderful energy of God.

Energy that is powerful and effective in so many ways. One of these energy words is used to tell us about the word of God. It is full of living power.

God's energy is always effective. The Bible itself is the word of God, and it is full of living power in the way that it speaks to people in thousands of different languages, and people's lives are changed wonderfully when they believe it.

[1 : 10] You find that from the very first page of the Bible, where we are told, God said, and the whole of creation came into being. God's word is always powerful and effective.

And we can say that his word is like renewable energy. It doesn't run out. It is always the same. And you can trust that word with your very life. And a prayer.

We thank you, dear Lord, for your word. Help me to believe it and trust it as your guide for my life. Amen. Amen. Amen.
